# 1. Kit Name

X86VMS-PERFMGMT-V0301-1-ECO1

## 2. Kit Description

### 2.1. Installation Rating

INSTALL\_2: To be installed by all customers using the following feature(s):

OpenVMS x86\_64 V9.2-4

VSI Performance Management for OpenVMS v3.1-1

This installation rating serves as a guide to which customers should apply this remedial kit.

Reference the [Disclaimer of Warranty and Limitation of Liability Statement](#).

### 2.2. Reboot Requirement

No reboot is necessary after installation of this kit.

However if the IMAGE\_SECURITY parameter is set to a value greater than one, or secure boot was enabled during the last boot, you should execute the Performance Management Agent startup procedure:

```
$ @SYS$STARTUP:PERF$AGENT$STARTUP.COM
```

### 2.3. Version(s) of VSI OpenVMS to Which This Kit May Be Applied

VSI OpenVMS x86-64 V9.2-3 or higher

## 3. Kits Superseded by This Kit

None

## 4. Kit Dependencies

VSI Performance Management for OpenVMS V3.1-1

## 5. Problems Addressed in This Kit

### 5.1. VSI Performance Management V3.1-1 may not function correctly on VSI OpenVMS x86-64 E9.2-4

#### Problem Description

VSI Performance Management V3.1-1 will not function correctly on VSI OpenVMS x86-64 E9.2-4 when Secure Boot is enabled or the IMAGE\_SECURITY parameter is set to a value higher than 1.

## Images and/or Files Affected

SY\$LOADABLE\_IMAGES:PSDC\$LOADABLE\_IMAGE.EXE  
SY\$LOADABLE\_IMAGES:PSDCTIMER.EXE

## VSI Case Identifier

Jira BSS-156

## Release Version of VSI OpenVMS That Will Contain This Change

Not applicable

## Workaround

1. Disable secure boot if enabled.
2. Set the IMAGE\_SECURITY parameter to 1 or 0. A warning will be displayed if IMAGE\_SECURITY is set to 1 but the product will function correctly.

## 6. Problems Addressed From Previous Kits

None

## 7. Images or Files Replaced

SY\$LOADABLE\_IMAGES:PSDC\$LOADABLE\_IMAGE.EXE

SY\$LOADABLE\_IMAGES:PSDCTIMER.EXE

## 8. Installation Instructions

### 8.1. Compressed File

This kit is provided for download within a ZIP archive container file.

Info-ZIP's freeware ZIP and UNZIP tools are provided for use on this VSI OpenVMS version. Your site may have already set up symbols for these tools or other equivalent ZIP tools. If not, use the following command to define a symbol to run the UNZIP image:

```
$ UNZIP ::= $SYS$SYSDEVICE:[VMS$COMMON.SYSHLP.UNSUPPORTED.UNZIP]UNZIP
```

Then invoke UNZIP to unpack the kit using the command:

```
$ UNZIP X86VMS-PERFMGMT-V0301-1-ECO1.ZIP
```

This will extract the installable VMSINSTAL product kit files and their associated signed manifest (\_VNC file), used for kit validation during **VMSINSTAL** commands.

VSI strongly recommends always using the manifest to validate the kit content during any **VMSINSTAL** commands. This will occur automatically if the files are both contained in the same directory.

## 8.2. Installation Command

Install this kit with the VMSINSTAL Utility by logging into the SYSTEM account and typing the following command at the DCL prompt:

```
$ @SYS$UPDATE:VMSINSTAL VPA031 <name-of-directory-where-the-kit-is-located>
```

## 8.3. Special Installation Instructions

None of the files replaced by this installation are contained in the system memory disk, therefore it does not need to be updated.
